

# **MMUSIC WG**

**47th IETF**

**30 March 2000 - Adelaide**

# MMUSIC Agenda

**1530 Agenda Bashing & Status Update (chair, 5)**

**1535 SAPv2 Review -06 (Perkins, 15)**

`draft-ietf-mmusic-sap-v2-06.txt`

**1550 Issue: SAP Server Access Protocol (chair, 5)**

**1555 SDP Directory Type (Finlayson, 15)**

`draft-ietf-mmusic-sdp-directory-type-00.txt`

**1610 SDP Source Filter List (Thaler, 20)**

**1630 ATM QoS in SDP (Taylor, 10)**

`draft-rajeshkumar-mmusic-sdp-atm-00.txt`

**1640 SDP Codec Capability Attribute (Beser, 10)**

`draft-beser-mmusic-capabilities-00.txt`

# MMUSIC Agenda

**1650 RTSP Fixes & Clarifications (Rao, 10)**

**RFC 2326**

**1700 RTSP Extensions (10)**

**draft-sheedy-mmusic-rtsp-ext-00.txt**

**1710 RTSP Caching (15)**

**draft-periyannan-rtsp-caching-06.txt**

**1725 Moving forward with RTSP (chair, 5)**

**1730 Wrap up**

# WG Status Update

- **Mailing list is about to move**
  - **mmusic@informatik.uni-bremen.de**
  - **Majordomo administered list**
- **Please subscribe to the new list**
  - **there will be no automatic transfer**
  - **mails will be forwarded from confctrl@isi.edu for some time to come**
- **Details to be announced after IETF**

# **MMUSIC Charter**

**Well, we should have a new charter by now...**

**But:**

**Scope may be perceived too broad.**

**Right now...**

**Working with IESG to sort this out.**

**More to be seen on the list shortly.**

# **SAP Issue: Server Access**

- **SAP is really a Server-Server protocol**
  - **SAP announcements infrequently**
  - **takes time to learn about sessions**
  - **announcements often depend on eg SDR processes to stay around**
- **SAP Server Access Protocol needed**
  - **allow client to initiate announcement**
  - **receive (selected) SAP announcements**
    - **unsolicited or on-demand**
  - **support for directories?, security, ...**

# RTSP (1)

- **Cleaning up the spec (for draft?)**
  - **Fix inconsistencies**
  - **Fix bugs**
  - **Provide clarifications where needed**
- **Overview of implementations**
  - **What is really implemented?**
    - Remove unnecessary parts from the spec
  - **Demonstrate interoperability**
  - **Satisfy preconditions to go to Draft**

# RTSP (2)

## How many documents?

- **Base spec for Draft?**
  - Limits requiring a cycle in Proposed?
- **Extensions for other Transports**
  - Generalization needed
  - Necessary fixes to go into base spec
  - Remaining stuff: separate doc (if any)
- **Caching**
  - keep as separate spec
