

Key Management Extensions for SDP and RTSP

`<draft-ietf-mmusic-kmgmt-ext-03.txt>`

Revision history

- More rationale (from an “SDP” perspective rather than security perspective)
- Adoption of offer/answer model
- ABNF grammar updated to conform with SDP and RTSP
- Scenarios / examples added

SDP extensions

`keymgmt-prtcl = "keymgmt-prot:" prtcl-name`

`prtcl-name = non-ws-string`

`keymgmt-data = "keymgmt-data:" byte-string`

`key-extra-auth = "keymgmt-auth:" byte-string`

RTSP extensions

KeyMgmt = "KeyMgmt" ":" [stream-url] protocol data

stream-url = "url" "=" url ";"

protocol = "Prot" "=" token ";"

data = "Data" "=" quoted-string
